Case Study: Resuelve tu Contibilidad

How might we duplicate the functionality of the existing Resuelve software, and decrease the amount of time accountants spend per client.

Process:

1) User interviews
2) Product Design Sprint
3) Information architecture/
4) Wireframing
5) Visual Design
6) Front end development

Challenges:

- Complicated software
- Built over years
- Tight time constraints to launch
- Current system/solution
- Complex accounting functionality, while eliminating unneeded
- Language barrier
- System barrier (different tax system)

Product Design Sprint

Information Architecture

Wireframing

Low-Fidelity Mockups

High-Fidelity/Visual Design and Front-End Development
